THE FUND IS SUITABLE FOR INVESTORS

- Looking to achieve long-term capital growth.
- That want to preserve the purchasing power of their capital over the long-term.
- Who seek exposure to the earnings potential of equities while taking advantage of the fund's multi-asset mandate, which enables a reduction in equity exposure in periods of high risk.

The full details and basis of the awards are available from the Manager.

INVESTMENT PHILOSOPHY

Preserving capital and creating wealth are the cornerstones of Rezco's investment philosophy. Meticulous, concentrated share selection enables the Rezco Value Trend Fund to be less correlated to the overall market and enables the Fund to potentially generate superior performance for investors. Our stock selection strategy focuses on international and domestic companies with strong earnings growth records, sustainable revenue streams and relatively low borrowings. By identifying companies which combine these features, Rezco is able to undertake in-depth research required to select new shares for the portfolio which can achieve a secure balance between risk and growth.

OBJECTIVE AND BENCHMARK

The Fund aims to outperform the South African equity market over the long term, without taking on greater risk. By preserving capital and creating wealth the Fund delivers good returns across the cycle with low volatility. The Fund's benchmark is the FTSE/JSE All Share Index (J203).

The Fund aims to achieve returns well in excess of inflation measured over three to five year periods (CPI + 5%). The Manager does not make any guarantees concerning the capital or return of the Fund.

2015-09	0.45926
2015-03	0.35600
2014-09	0.41597

* Dividends are declared semi-annually for the 6 month periods ending February and August

SPECIFIC FUND RISKS

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Developing market: Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

Multi-asset investment: The Fund is subject to possible financial losses in multiple markets and may underperform more focused funds.

Third party operational: The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure. An example of this would be a systems failure within our administrator.

GLOSSARY

Annualised performance: Annualised performance is the average return per year over the period.

Maximum drawdown: The largest peak to trough decline during a specific period of an investment.

NAV: The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

Risk profile: A measure (Low, Moderate, Aggressive) of how much the value of a fund has fluctuated since inception. A rating of Low represents the lower end of the risk scale with potentially lower rewards available whilst a rating of Aggressive reflects higher risk but potentially higher rewards.

Total Expense Ratio: TER includes the annual management fee, performance fee and administrative costs but excludes portfolio transaction costs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.

Volatility: The amount by which the performance of a fund fluctuates over a given period.

Sortino Ratio: The excess return over the risk-free rate divided by the downside semi-variance, and so it measures the return to "bad" volatility. A large Sortino ratio indicates there is a low probability of a large loss.

Important Information

Rezco Collective Investments Ltd is an authorised management company in terms of Collective Investment Schemes Control Act 45 of 2002.

Unit trusts are medium to long term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Unit trusts are traded at ruling prices and may engage in borrowing. Unit trusts are not normally taxed as traders but this cannot be guaranteed. General information about the company and its products and services is provided by Rezco Collective Investments Ltd. Actual annual figures are available to the investor on request. No guarantees about the suitability or potential value of any information or particular investment source are given by Rezco Collective Investments Ltd. The information in this document does not constitute any form of advice. A registered financial advisor should be consulted prior to taking any investment decision. A schedule of fees, charges and maximum commissions is available on request from the Manager. Performance is calculated for the portfolio; however, individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The portfolio is valued each day @ 15h00 and the cut-off time for submission of transactions is 14h00. Prices are calculated and published on each business day. In order to obtain additional information, you may visit our website www.rezco.co.za or contact us on 0861 739 468. Nothing contained in the content of our fact sheet constitutes a solicitation, recommendation, endorsement or offer by Rezco, but shall merely be deemed to be an invitation to do business.
