REGIME CHANGE

The future won't look like the past,
Why investors need to be flexible.

BASE MARKET ASSUMPTION FROM 2009 TO 2022

INFLATION IS DEAD, WORRY ABOUT DEFLATION

THEREFORE:

2008 to 2022: The great QE experiment
Pushed down interest rates. Print Money.

THEREFORE:

CASH IS TRASH

THEREFORE:

TINA There Is No Alternative To Equities (and Debt)
Fiscal policies such as: Modern Monetary Theory (Just print money)

BUT **The inflation zombie is alive**
Cash can get 5% - great alternative

THE COUNTER VIEW

The extra cash in the system keeps the economy rolling along

Everyone is expecting a recession - but the economy is not really slowing and neither are company earnings.

Does this mean soft landing or that the Fed and other Central Banks have to squeeze even harder.

INTEREST RATES AND MARKETS

The bear/recession only starts after rates pause

JANUARY 2023 PRESENTATION:

REZCO SCENARIOS FOR 2023

SCENARIO	OPTIMISTIC	BASE	FAT TAIL
	Soft Landing	Normal Recession	Hard Recession or Shock
PROBABILITY	30%	60%	10%
EARNINGS IMPACT	0% to 5%	-10% to -25%	-25% to -45%
DESCRIPTION	Inflation falls to target while wages decelerate, corporates tighten up but profits are stable and balance sheets strengthened	The Fed needs a recession to break inflation, unemployment rises to curb wage increases, services inflation is stickier and requires a recession to cool demand	Something breaks due to: 1) impact of rapidly increased interest rates; or 2) geopolitical shock eg Ukraine and nuclear tensions; or 3) inflation remains sticky

JAN 2023: EXPECTING A RECESSION

But hard data is coming out too strong
GDP Revisions have turned positive

EUROPE & UK ALSO MUCH STRONGER THAN EXPECTED

Real Core Consumption and Savings Rate

THE CRUX OF THE ISSUE IS SENTIMENT VS HARD DATA:

MRB NON CONSENSUS VIEW

Chart 9 Unlike Sentiment,
Hard Data Has Improved In Q1

* First principal component of standardized data; MRB calculation based on 580 underlying data series; truncated above/below +/- 1.5

Note: Shaded for NBER-designated U.S. recessions

Source: MRB

MARKET IS DISCONNECTED FROM THE FED (STARTED WITH THE SVB COLLAPSE)

HOW WILL THIS IMPASSE RESOLVE?

Market is pricing this resolves by the Fed cutting from Sept

Labour doesn't want to take the hit (and it is political suicide to suggest they do)

Companies prices are not regulated, they are protecting margins

Politicians are well known to avoid short term pain at the expense of the long term good

Fiscal policy is leaning towards stimulus, monetary policy remains timid

DOES THE FED NEED A BANKING CRISIS OR JUST CREDIT TIGHTENING? OR A RECESSION

Sentiment not enough to cool inflation

A BANK WALK IS MORE LIKELY THAN A BANK RUN (CRISIS)

Which in turn is unlikely to tame inflation.

“If we can just get through this winter then everything will be fine as solar rolls out” = wrong answer >>> NEED MORE DETAILED ANALYSIS

SA INC VALUE, OR VALUE TRAP

ENERGY SUPPLY IS KEY HERE

SA Inc Top 40 Equally weighted 12m forward P/E

Source: Refinitiv Datastream. Construction: Equally weighted consensus forward P/E's of the largest 40 largest JSE stocks each month, excluding miners, oil, paper producers or where a majority of the stocks earnings are derived from outside South Africa.

CONSENSUS IS MAKING A BIG ASSUMPTION

Load Shedding if Medupi Kusile Return to Service delayed

Base Case:

- Medupi # 4 back
 - Oct 2024
- Kusile # 1-3 back
 - Feb 2024
 - Aug 2024
 - Feb 2025

Downside scenario:

- Medupi # 4 back
 - Apr 2025
- Kusile # 1-3 back
 - Sept 2024
 - May 2025
 - Jan 2026

Worst Case:

- No failed units back by Dec 2025
- (Kusile # 5,6 both on during 2024)

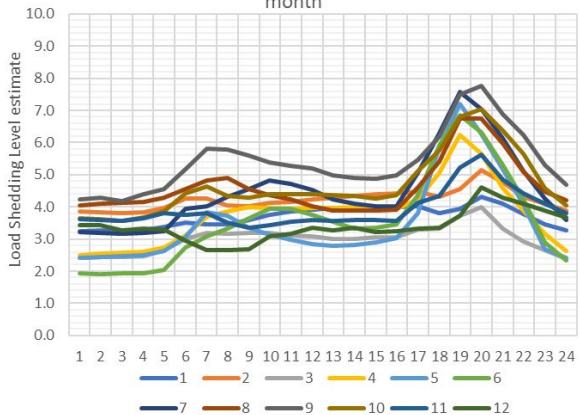

SOLAR WILL HELP PROTECT THE ECONOMY IN 2025

Base Case 2023

Base Case 2025

Worst Case 2025

2023F: Load Shedding per hour of day, for each month

2025F: Load Shedding per hour of day, for each month

2025F: Load Shedding per hour of day, for each month

The PV fallacy: PV does reduce load shedding **during daylight hours** (i.e, a good thing)

But at 8pm, load shedding in 2025 will be up to **level 5 (base case), or worst case level 8**

THE SYSTEM IS DETERIORATING NOT MEAN REVERTING

GRID RISK IS THE FAT TAIL

EARNINGS IMPACT	?	0% to 5%	-10% to -25%	-25% to -45%
DESCRIPTION	The Fed hasn't done enough to cool inflation, the market is pricing that the economy can operate with steep negative sloping yield curve, strong economic data, strong consumers and corporate earnings, high wage inflation, but declining CPI	Inflation falls to target while wages decelerate, corporates tighten up but profits are stable and balance sheets strengthened	The Fed needs a recession to break inflation, unemployment rises to curb wage increases, services inflation is stickier and requires a recession to cool demand	Something breaks due to: 1) impact of rapidly increased interest rates; or 2) geopolitical shock eg Taiwan/Ukraine and nuclear tensions; or 3) inflation remains sticky - Fed hasn't done enough

FLEXIBILITY THROUGH VOLATILITY

Key points to wrap up

- **Decreasing** our probability of a recession this year
- **Increasing** the probability of a negative tail event
- **The market is over-discounting** a soft landing or a soft Fed
- We see the Fed taking action and hiking in H2 vs market pricing in rate cuts (absent a banking crisis)
- **Strong economic data and sticky inflation** will not be tolerated by the Fed
 - we see the disconnect between bond and equity markets resolving through higher yields, flatter yield curve and lower equity prices
- **It is important for investors to stay flexible**
 - **the high probability outcomes are divergent**, with no option for the average - must be able to handle all probable outcomes
